

AixpertSoft GmbH is a privately owned software company based in Aachen (*Aix-la-Chapelle*), Germany.

AixpertSoft started out as a part of the IT consulting company ComConsult Kommunikationstechnik GmbH and became an independent subsidiary in 2006. Since then, our sole concentration has been software development. This focus combined with the experienced management, sales and marketing, and development teams active within our parent company since the early 1990s has allowed us to provide our customers with professional-grade products and services of exceptional quality. Our customers include many Top500 companies dealing in industry, finance, research, the public sector, and other IT services. This rapport has expanded our wealth of knowledge of these branches and their specific IT requirements.

Our longstanding experience in the documentation and management of IT infrastructures has afforded AixpertSoft a comprehensive expertise in Data Center Infrastructure Management (**DCIM**) and IP Address Management (**IPAM**). The AixBOMS product line is known as an Advanced CMDB due to its outstanding properties and early adoption of progressive technologies, such as IPv6, hardware and software virtualization, cloud computing, and SaaS.

After celebrating AixBOMS' 10th birthday in 2012, AixBOMS was named the winner of the **Innovationspreis-IT 2013** ([Initiative Mittelstand](#)) in the **IT-Service** category. Shortly thereafter, AixBOMS was also awarded the **eco Internet Award 2013** as "[Best Solution](#)" in the **Housing / Hosting / Data Center** category by the [eco e.V.](#) (Association of the German Internet Industry). AixBOMS has also been selected as one of the [Top15 DCIM Tools](#) by **DataCenter-Insider**. Both in 2015 and 2016 AixBOMS received the prestigious [Silver IT-Award](#) presented by DataCenter-Insider, based on their readers' choice! Today, AixBOMS is used by about 15.000 users.
